

Serial No.: 09/928,383

**REMARKS**

Careful consideration has been given to the Official Action of February 20, 2003 and reconsideration of the application as amended is respectfully requested.

Claims 8 and 9 have been cancelled and replaced by Claim 10. This claim combines the features of Claim 9 with those of Claim 8.

The Examiner has rejected Claims 8 and 9 on Takahara under 35 U.S.C. 103(a). The rejection is respectfully traversed.

In the rejection, the Examiner has not taken into consideration subject matter set forth in Claim 9 (and now present in Claim 10). In this regard, the present invention is directed to a head mount image display device which is characterized in that an image of a virtual keyboard which includes input keys to be assigned by a key assignment means and an image displaying a result of an arithmetic operation performed by an arithmetic unit are synthesized and displayed side by side on one single screen.

In contrast, the Takahara patent does not disclose the feature of displaying two images of a virtual keyboard and a result of an arithmetic operation arranged side by side on one screen, as originally set forth in Claim 9 and now included in Claim 10.

For the above reasons, it is respectfully submitted that Claim 10 is now in condition for allowance and favorable reconsideration is earnestly solicited.
